The light that outshines

Krislite, the leading provider of Total Lighting Solutions in Asia Pacific, celebrates another corporate milestone with the opening of Krislite Building and LED Hub — Singapore's first LED-centric lighting product gallery that presents a wide spectrum of architectural and decorative lighting products. Since its incorporation in 1992, Krislite has transformed itself from a local distributor of lighting products to become an industrial specialist in LED and sustainable lighting solutions in Asia Pacific region.

With a gross floor area of 130,000 square feet, the 5-storey Krislite Building features high-ceilings and various eco-friendly features, including energy-efficient LED facade lighting; while the 20,000 square feet LED Hub is built with the vision to serve as a valuable experiential resource and learning centre for trade, institutions and clients. Prepared to be awed and inspired — explore a spectrum of spectacular lighting possibilities and immerse yourself in the future of lighting.

“ We have certainly come a long way from a small lighting distributor that operated out of a JTC flatted factory at Kallang Way more than 20 years ago. Moving forward, we will continue to centralise our operations, R&D, assembly and quality facilities in Singapore and position ourselves to be the distribution hub for the whole of Asia Pacific region. This way, we can proudly call ourselves a Singapore Brand with strong internationalisation plans. ”  
Mr Jimmy Teo, Group Managing Director
